ABOUT

The STEM MENTOR EXCHANGE (a.k.a. STEMatch) is a mobile application designed to connect Utah educators with industry mentors and resources.

It is being developed by a team of engineers from Dell-EMC in Utah with support from the STEM Utah Industry Coalition; and in collaboration with the Utah Technology Council, Women Tech Council, Bio Utah the STEM Action Center, and the Utah State Board of Education.

By building strong relationships between industry and education professionals we can help students prepare for all the great jobs being created in Utah.

SIGN-UP

To successfully launch the STEM Mentor Exchange we need you to register your contact information and what you teach or mentor, and what resources you might need or have available.

Thousands of Utah educators, mentors, companies and organizations are joining forces to help prepare our K-12 students for the exciting jobs and careers that await them.

Please go to **www.stemmx.com** and complete the profile and resources survey.
