11:49:40 From Bobbie: I second Robert--Go Bears!

11:50:58 From Dani to All panelists: With some CTE Pathways, there are shorter term certifications that really provide an opportunity to stack credits into higher degrees and are great opportunities to engage in higher ed . I've noticed with COVID and with increased online content for traditionally very hands on programs (the career doesn't interface with computers as much), some students who are non traditional (adult, coming back to school) who do not work in careers that require high IT skills are struggling and dropping out. Then for those programs requiring accreditation the schools are thinking, maybe we up entrance standards in the terms of the GPA to enter. I fear this is creating barriers to access and telling students they don't belong at the university and second chances/lifelong learning isn't a thing. How would you recommend universities adapt with COVID-19 but still help

these students with lower computer literacy skills? Maybe this can't be answered but is something I wanted to throw out to the group to consider.

- 12:10:38 From Ann: Please know you can post questions in this chat. Please put a "?" before the question. Thanks!
- 12:11:33 From Ann: This is a great opportunity to utilize the experience of these amazing panel members
- 12:17:11 From Dani: ? Certainly more virtual learning requires higher computer literacy/IT skills, which is not always common for many adult learners trying to re enter learning environments, and the learners with potential for their degree to provide income mobility who we really want to reach (i.e. working in service industry and now a CNA, for example). How have your states and programs adapted to provide concurrent training on computer literacy with the new virtual training for traditionally more face to face/hands on certifications?
- 12:18:12 From David Walters: <https://www.transfrvr.com/alabama> Check out some of the ways we are using virtual reality in Alabama.
- 12:19:31 From Ann: If you would like to view captions in a transcript mode go to <https://recapd.com/w-f4IKLQ> You can use this link on other devices.
- 12:25:01 From Anne: ? As Dr. Lambert stated in his opening remarks, people will find any excuse to not get started (example of system being down and the woman saying it is sign she should not be starting). The pandemic provides multiple reasons to not start their education. Do have thoughts or ideas on how to reach those who were on the fence to begin adult education and have put it off because of the pandemic?
- 12:26:26 From Ann: Please know you can post questions in this chat. Please put a "?" before the question. Thanks! This is a great opportunity to utilize the experience of these amazing panel members
- 12:27:56 From Teresa: ? Have you had any resistance from staff transitioning to how things are now due to the pandemic?
- 12:29:58 From Amanda: ? Can you explain the concept of Ready to Work in Alabama
- 12:30:35 From Ann: ? can any of you share an example of how out of this pandemic comes success.
- 12:30:48 From Robert: ? In Chicago, the <http://www.chicagocitywideliteracy.org/> was able to integrate LWIA 7 WIOA Adult Education providers, Workforce training programs and all WIOA Core Partners including the IL Dept of Employment Security and the IL Dept of Human Services, who are currently struggling with so many SNAP, TANF and Unemployment claims. Can you share collaborations with your local WIOA core partners to service clients with a one stop culture approach?
- 12:30:49 From Michael: ? What conversations are being had at the higher education about the reduced amount of rigor that was required in the spring, is happening now, and the increase in the number of disengaged learners in the K-12 setting due to distance learning formats? Is there any national data that they could share?

- 12:31:09 From Cheryl to All panelists: ? Yes, I'm interested in knowing what the Ready to Work Program looks like virtually. Can you elaborate?
- 12:32:50 From Patricia: We have a similar Ready to Work program here at Piedmont Technical College in SC!
- 12:33:28 From Betty to All panelists: No resistance, but I saw a need to encourage an increase in written interaction between the teachers and students. I do work at a prison and we were forced to do a lot of distance learning due to the pandemic. Teachers must get accustomed to written communication with their students even though they were not meeting face to face.
- 12:33:38 From Cheryl to All panelists: Question is answered.
- 12:34:13 From Tim to All panelists: We also use Winlearning. They have a very robust Soft-skill program.
- 12:34:28 From Ann: Great questions, keep them coming!
- 12:34:39 From Tim: We also use Winlearning. They have a very robust Soft-skill program.
- 12:34:48 From David Walters: [www.accs.edu/readytowork](http://www.accs.edu/readytowork) Here is the link to information on our RTW program.
- 12:35:48 From Steve: how are you addressing mental health / social and emotional learning needs for adult learners in this pandemic situation; can you share examples of how you provide supports?
- 12:38:27 From Ann: Please be sure to put a "?" before your question, just makes it easier to identify in the chat. Thanks!
- 12:39:51 From Hope Cotner: <https://gedplusky.org/>
- 12:40:11 From Vivian: Vivian Shelton Irving, Texas Great Info.

- 12:49:14 From Rocio to All panelists: So, would you recommend to have more resources in HS instead of GED?

- 12:49:18 From Demetria to All panelists: increase Talent population...

Keep a work journal and write something positive as your thought for each day in a prominent place. If possible listen to encouraging music, pray or meditate before entering the work environment. Do it when you go to the restroom also:-). Write a statement of gratitude for each day at home or in your work journal. Hope some of that helps!!

13:17:25 From Bobbie: It's so important, now more than ever, to explore & expand on the upskilling potential for retail employees. This is a fundamental piece to the work I'm involved in at the Colorado Workforce Development Council: <https://cwdc.colorado.gov/lives-empowered>

13:18:23 From Ann: We will need to be read to serve these returning students and get them some industry based credentials.

13:19:06 From Stephen to All panelists: Josh you mention the people in retail don't have college but what about skills? We are in need of skilled labor.

13:21:00 From Ann: Transferrable skill identification will be key for this population as well.

13:22:56 From Cheryl to All panelists: It's back on now; I lost it too.

13:23:25 From Teresa to All panelists: I was disconnected for minute but all is well now.

13:23:57 From Stephen to All panelists: Josh, why would people in skilled labor work from home? what do you mean by uneducated? unskilled would be my concern if I was looking at an occupation

13:24:58 From Stephen to All panelists: I disagree with your theory on college vs skills levels.

13:26:49 From Stephen to All panelists: 20% of the workforce needs a 4 year college degree in 2020,

13:27:33 From Stephen to All panelists: 20% of the workforce in 1950 needed a 4 year college degree in the workforce literally the same as today.
